

Hayes 2008 Addition

The site shown below may not look like much now but by the end of the summer, construction will be complete on an 8,000 square foot addition.

The new addition will allow us to maintain our state-of-the-art manufacturing capabilities, while giving us the extra space for additional inventory, new product lines and engineering.

Our goal is to keep our business growing to exceed your expectations for quality products, customer service and on-time deliveries.
