All pump mounts are made of aluminum alloy for a strong light weight part.

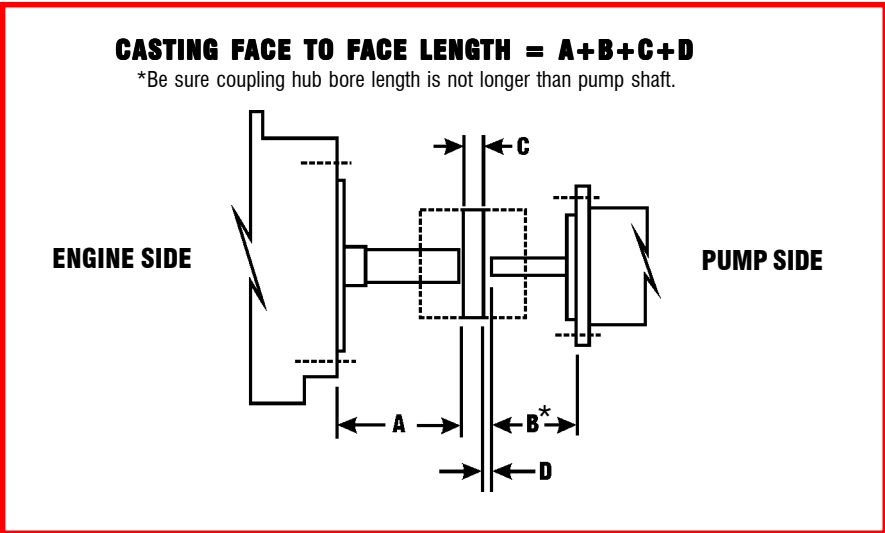

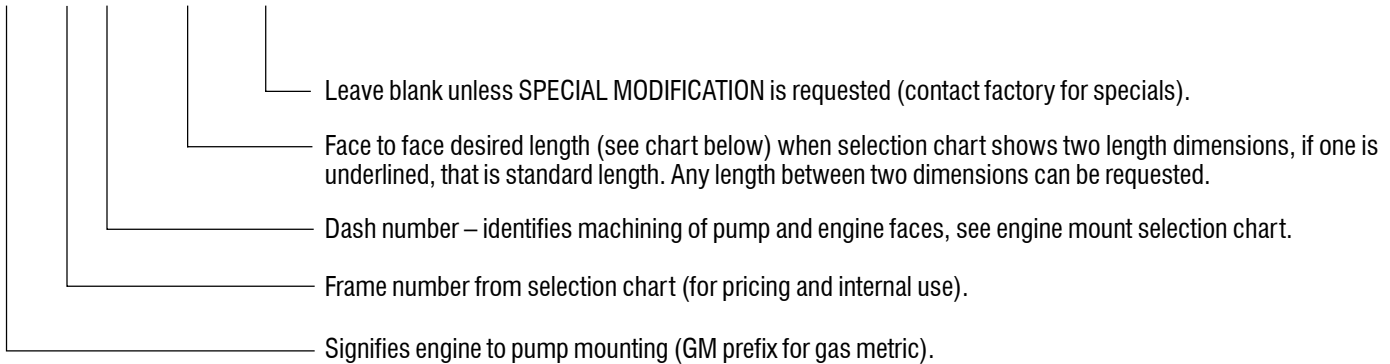

*Next day expedited service available on any part in catalog.

* Order quantity limited

ENGINE/PUMP MOUNT PART NUMBER SELECTION

EXAMPLE:

G 16-134 6.00 XXX

The above dimensional information must be obtained from actual measurement or from engine, pump, and coupling manufacturers catalog.

- A-** Engine shaft length including pilot depth to engine block.
- B*-** Pump shaft length including pilot depth to pump flange mounting face. (In some applications this can be coupling hub bore length if pump shaft is short).
- C-** Width of flexible coupling insert.
- D-** Clearance as required, normally 1/16" to 1/2".

- Note:**
1. If shaft and coupling stack up does not provide for "D" clearance, consideration should be made to shorten engine shaft or select a shaft coupling with thru hole in insert for shaft clearance.
 2. All 2 bolt pump mounting holes are horizontal unless requested for other position.

Safety Note:
 In locations where coupling access is not covered or where body, loose clothing or equipment may be exposed to rotating coupling, this cover must be used.

Part number of access cover is listed with each mount number along with quantity required.

Mounts offer easy assembly of pump to vertical motor

Vertical pump mounts allow pump/motor assembly to be directly mounted to reservoir.

Pump coupling and shafts are within reservoir for enclosed, quiet operation.

Faster assembly of equipment with this accurately machined, aluminum casting.

Note:

Outside diameter of pilot on vertical V70 & V71 mounts is 4 7/8".

Outside diameter of pilot on vertical V72 & V73 mounts is 5 3/4", 5" on V74.

VERTICAL ADAPTER RINGS

Vertical adapter rings are offered to enable standard horizontal mounts to be used for vertical tank mounts.
Material - Aluminum alloy

Part Number	Motor Frame	A	B	C	D	Tank Open
1101	182 TC - 256 TC	11 $\frac{1}{2}$ " Diameter	8 $\frac{1}{2}$ " Diameter	10 $\frac{1}{4}$ " Bolt Circle	7 $\frac{1}{4}$ " Bolt Circle	9" Diameter
1102	284 TC - 286 TC	13 $\frac{1}{2}$ " Diameter	10 $\frac{1}{2}$ " Diameter	12 $\frac{1}{2}$ " Bolt Circle	9" Bolt Circle	11 $\frac{1}{4}$ " Diameter

ASSEMBLY AID

Enables 090/095 Series love joy or other couplings 2.312" diameter and smaller to be positioned on pump shaft prior to pump assembly to mount.

COUPLING TRANSFER RING

Add - 015 to part number (special modification)
(Includes ring and machining to accommodate)

EXAMPLE: G15 - 117 - 5.62 - 012

1104 Ring part number (for replacement)

* Horsepower ratings based on use with Hydra-Mount direct mounting pump mounting brackets. Go minimum one size larger for foot mount applications. Ratings based on gear or vane pump drive.

**Torque ratings based on Sox (Buna N) material.

- No lubrication required
- Easy installation
- Easy inspection of spider
- Provides smooth transfer of power
- Resistant to water, oil, and dirt
- No metal to metal contact
- Available with metric and spline bores
- Available with urethane and Hytrel spiders for higher torque ratings

Misalignment Capacity
Angular up to 1°
Parallel up to .015 inches

Each coupling half standard with one keyway and set screw at keyway

Ordering information: Specify bore and keyway required for each coupling half. Complete coupling consists of two coupling halves and one spider.
