Hayes Aluminum Housings

There are thousands of Hayes aluminum housings in service throughout the world. Together with our original Hayes flywheel coupling and our torsionally stiff HEX-FLX flywheel couplings, our aluminum housings tackle tough gas and diesel engine applications.

Hayes housings take up very little space while supporting a significant amount of weight. They are available with a wide variety of mounts and sensor options and can be used in conjunction with our bearing-supported stub shafts and generator drives.

Design Characteristics:

Sturdy Aluminum Castings:

- Heat-treated aluminum housings
- Thick walls for extra support and thread engagement

Mounts:

- Foot Mounts
- Side Mounts
- Face Mounts
- Top Mounts
- Special pump mount options are always available

Features and Advantages:

- Sturdy high-strength aluminum construction
- Custom fit to engine starter plates
- SAE and non-SAE pump mounting
- Standard and special engine mounts
- Custom/personalized housings available upon request
- Thick wall design for heavy pump applications
- Painted housings (available upon request)
- Competitively priced and normally in stock

Applications:

- Our housings are used on a variety of different diesel and gasoline applications.
